DEPTH™ Fish Tapes FINDER

Designed with input from professional tradesman, Klein Tools' new Depthfinder™ Fish Tapes combine high quality manufacturing with true innovation. With exclusive features such as our patented laser length marked steel tape, raised finger grips and a "speed wind" handle, the new Depthfinder™ line of Fish Tapes offers the professional tradesman the ultimate in comfort, durability and functionality.

Permanent, laser etched 1' increments on the tape allow you to more accurately measure the depth of conduit runs and determine the amount of tape left to pay out.

The Ultimate in DURABILITY!

In a side-by-side drop test with major industry competition, **all sizes** of Klein's new Fish Tapes **remained 100% functional** after 20 drops from a height of 25'. This means no matter what size or style of tape you use, you can rely on the **professional quality, performance and durability** that Klein Tools is known for.

Easy to use
Save time
and materials

Unique sloped handle optimizes the position of your hand for quick hand-over-hand rewinds and allows a more level tape payout.

QUALITY TOOLS SINCE 1857

Raised finger Grips help transfer 100% of the winding power from your hand and fingers.

The round inner ring design provides a smooth, consistent and comfortable surface for winding and rewinding.

Polypropylene case and handle are extremely durable and offer the maximum in shock and impact resistance.
