Footnotes

Products may not reach minimum R-value alone but can reach the desired R-value when used in conjunction with other products as system.

In some areas building code may require additional insulation be added above the PINKCap® insulator to achieve a R-value equal to the surrounding ceiling. To avoid insulation material from spilling into the living space and enable placement of insulation as you exit, unfaced blanket fiberglass should be used.

In some areas building code may require additional insulation be added above the Attic Stair Insulator Kit to achieve a R-value equal to the surrounding ceiling. To avoid insulation material from spilling into the living space and enable placement of insulation as you exit, unfaced blanket fiberglass should be used. Wood framing may be necessary around the Attic Stair Insulator Kit to support any additional unfaced blanket fiberglass added above it.

- (1) All insulation materials and systems must be installed in accordance with the prescriptive requirements of the 2009 International Energy Conservation Code (IECC).
- (2) Windows must be installed in homeowner's primary, existing residence and meet the ENERGY STAR criteria in Homeowner's region. For details, visit http://www.energystar.gov/index.cfm?fuseaction=windows_doors.search_climate
